

Bridge Constuction

The Miller Group
Miller Paving Limited

millergroup.ca

Over the past five years The Miller Group has worked on over 60 bridge related projects valued at over \$470 million. Our experience includes bridge repairs, design /build of new bridges, and removal and demolition of existing bridges.

The Miller Group is the only contractor to install a pre-fabricated girder/deck system on an Ontario highway. By using this system on the Beaver River Bridge in Blackwater and the Moose Creek Bridge in Timmins the Province was able to significantly reduce the construction schedule.

Miller was also the lead bridge contractor for the east extension of Highway 407. Construction of the six overpasses included work over rivers, rail lines and heavily traveled roadways.

The bridge sectors actively bid work in South-Central and Northern Ontario. Some of our clients include: The Regional Municipality of York, City of North Bay, and Ministry of Transportation Ontario.

All projects are coordinated through the following three offices: Brennan Paving & Construction in Markham, Miller Paving in Whitby, and Miller Paving Northern in New Liskeard.

The Miller Group is your commitment to excellence
