

Miller Concrete

The Miller Group

Miller Paving Limited - Cement and Concrete Group

millergroup.ca

Miller Concrete operates 14 ready mix plants and a fleet of over 80 mixer trucks in the Dryden, Greater Toronto, New Liskeard and Owen Sound areas of Ontario. Concrete and grout mixes, ranging from 0.4 MPa unshrinkable fill to 50 MPa high performance concrete, are supplied to residential, agricultural, industrial, commercial and institutional markets. Miller Concrete also has portable plants that can be mobilized for remote or high volume projects.

Ready mixed concrete is an extremely versatile and cost effective product that has made it one of the most common building materials in the world. By adjusting the basic ingredients, and with the use of chemical additives, the characteristics and performance of concrete can be customized to meet a wide range of applications and construction requirements.

Personal contact with each plant and professional technical services ensure that customers of Miller Concrete have the right mix delivered on time.

Miller Concrete plants use CSA, OPSS and MTO approved materials and all are certified with the Ready Mixed Concrete Association of Ontario.

The Miller Group is your commitment to excellence
