

# Composting Services

WWW.MILLERGROUP.CA

Miller Waste Systems is a leader in organic waste diversion systems. We offer a wide range of organic waste management solutions from municipal leaf and yard waste, to composting source separated organics, industrial, commercial & institutional, and residential collection programs.

We offer design/build/finance/operate compost facilities that include outdoor windrow, ebara in-vessel widebed technology and dranco anaerobic digestion abilities.

With waste diversion goals of 65% by 2008, Miller Waste Systems offers real waste solutions to reach these targeted goals. We can design very small compost facilities to large regional compost sites.

Miller Waste Systems combines lowtech and cutting edge technology to provide our many customers with solutions that are cost effective, while maintaining the highest quality compost possible.

By working together, high quality compost is utilized in many ways with a large portion being returned to our local communities. Residents, commercial businesses and municipalities are now reaping the natural organic benefits of compost that help in closing the recycling loop.
