

Miller Minerals

The Miller Group
Miller Minerals

millergroup.ca

Miller Minerals is a producer of high quality lime and limestone products for use in the Agricultural, Mining, Pulp and Paper, Steel and Environmental industries in northeastern Ontario and northwestern Quebec.

Agricultural limestone, quicklime and hydrated lime are produced and distributed from our Haileybury facility in northeastern Ontario.

Our quality management system is registered to ISO 9001:2008 with SAI Global.

Agricultural Limestone: a light gray colored finely ground product, with excellent acid neutralization characteristics.

Hydrated lime: used for many industrial applications such as water treatment, antistripping of asphalt, and soil stabilization.

Quicklime: a white porous solid obtained by the calcination of limestone and composed essentially of calcium oxide.

The Miller Group is your commitment to excellence
