

HIGH PERFORMANCE & REINFORCED CHIP SEALS

Preserve your roads and provide your public with a High Performance and/or Reinforced chip seal. These treatments provide a waterproofed riding surface that can combat heavier traffic loads and when reinforced with geotextile fabrics, it will help combat moisture related damages and prevent reflective cracking.

ATTRIBUTES

- Increases skid resistance
- Reduces water intrusion
- Eases construction
- Geotextile eliminates reflective cracking
- Improve frost-heave susceptibility
- Better performance on high traffic / speed roads
- Reduce glare and rain spray-off with high performance chip seals

-  Reduces life-cycle costs by 50%
-  Reduces energy use by 50% & greenhouse gasses by 55%
-  Reduces raw materials by 50%
-  Return to slow moving traffic in 1 hr
-  Extends life of a roadway up to 5-7 yrs

ISSUES ADDRESSED

- Raveling
- Oxidization
- Cracked and distressed and polished surfaces
